

CAR BODY REPAIR

DIGI SPOT

Rated Input Voltage	230V AC±15%, 50/60Hz
Rated Input Current	12A
Duty Cycle (10min/40°C)	3000A @ 5%
Output Current	3000A
Weight	22 kg
Dimensions	346 x 220 x 280 mm
Art. Nr.	800DIGISPOTW

3 Digital Control Functions:

- Manual Mode: Washer Welding / Carbon Heating
- Auto Mode: Quick dent pulling
- Pulse Mode: Ironing / Surface Smoothing

INDUCTION HEATER 100 kHz

Input Voltage	230V AC±15%, 50/60Hz
Rated Power	2 kW
Rated Input Current	5A
Duty Cycle (10 min/40°C)	15%
Output Frequency	100 kHz
Weight	4,4
Dimensions	335 x 105 x 170
Art. Nr.	800STRMHEATER

The Induction Heater use the high frequency electricity to heat materials that are electrically conductive. The heating is fast and consistent. The high frequency assist to reduce the heating zone because the heating is concentrated.

Loosening hard corroded connections or boinded joints. Three selectable timed heating mode ensure the optimal temperature. The different heating adapters are part of the package.
